

Z157 (aka 10-13 FHA)

STAMPING Z 157 1960

USGS QUAD MAP NORRIS JUNCTION (1986)

NGS PID PY0110

LATITUDE 44.738149638

LONGITUDE -110.698879279

ELEVATION 2270 m

DATE OF DESCRIPTION 2002

DESCRIPTION Station is located along the Norris-Mammoth highway, 1.3 km (0.8 mi) north of Norris Junction, in the sidewalk of bridge over the Gibbon River, near the northwest end of the bridge. The bench mark is a standard CGS bench mark disk set into a drill hole in the sidewalk near the northwest end of the bridge and is located 8.4 meters (27.6 ft) southeast from the northwest end of sidewalk, south of a sign for the Gibbon River, 5.2 meters (16.9 ft) southwest from the approximate center of road, 0.2 meters (0.5 ft) northwest from an expansion joint, and 0.2 meters (0.6 ft) northeast from the bridge wall. South of the bridge on the east side of the highway is a large pullout with a history exhibit, and north of the bridge, also on the east side, is a side road to the Norris campground.

This mark also has been described as 10-13 FHA. We are aware of no mark with that stamping in the vicinity and assume both descriptions refer to this mark.

Looking south along Mammoth-Norris highway at the bridge over the Gibbon River and bench mark (which is in the bridge sidewalk across the highway on the same side of river as the photographer).

Close up of bench mark, looking south.
